About documentation

Conventions and symbols

This section covers conventions used throughout this documentation.

italic

Uster interface elements.

example

Example value of a parameter, API method name or code example.

Note: Note. Additional information closely reletad with described topic, e.g. suggestion concerning given procedure step; additional conditions which have to be met.

Warning: Warning. Essential information concerning system's operation. Not adhering to this information may have irreversible consequences.

User portal enables initiating connections with monitored servers available to the logged in user.

The system also enables viewing the password to selected accounts and browsing passwords history to accounts managed by FUDO's password vault module.

Logging into the User Portal

Note: User Portal is compatible with the following web browsers:

- Google Chrome, Mozilla Firefox, Internet Explorer for Microsoft Windows.
- Google Chrome, Mozilla Firefox for Ubuntu.
- Google Chrome, Mozilla Firefox, Safari dla systemu operacyjnego Mac OS X.
- 1. Open web browser and direct it to the IP address of the User Portal.

Note: You can obtain the IP address from your system administrator.

- 2. Accept the security alert exception to display the login page.
- 3. Enter the username, password and click LOGIN.

6.4 Connecting over SSH on Microsoft Windows 7 and 10

Note: To automatically initiate SSH connections you must install PuTTY and configure association between client the app and the SSH protocol. To do the latter it is advised to install WinSCP, which will perform necessary configuration changes. Both programs must be in their 32-bit versions.

1. Download and install WinSCP.

https://winscp.net/download/WinSCP-5.9.5-Setup.exe

Note: Verify the checksum value to make sure that the integrity of the binary file has not been compromised.

2. Download and install PuTTY.

https://winscp.net/download/putty-0.68-installer.msi

Note:

- Install PuTTY in the default installation location: C:\Program Files (x86)\PuTTY\.
- During installation select default features set.

PuTTY release 0.68 Setup	- • •
Product Features Select the way you want features to be installed.	
Add shortcut to PuTTY on the Desktop Put install directory on the PATH for command prompts Associate .PPK files with PuTTYgen and Pageant	
This feature requires 3181KB on your hard drive. Back	Cancel

		Connect to server		

5. Click *Allow* to open the Terminal.

<u>.</u>	Terminal is opening an ssh connection to 10.0.150.150:122 for Google Chrome.app. Do you want to allow this?
	This will reveal your user name and network address to the other computer. To avoid being warned in the future add it to the ssh list of known hosts.
	Allow Don't Allow

6. The connection has been established.

Requesting access to safe

Note:

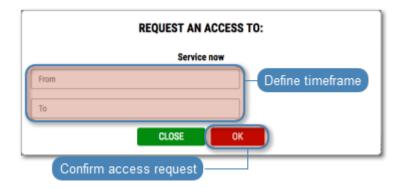

- Using this feature requires ServiceNow ticketing system.
- Usernames on Fudo PAM and *ServiceNow* must be the same to ensure correct requests processing.

To request access to safe, proceed as follows.

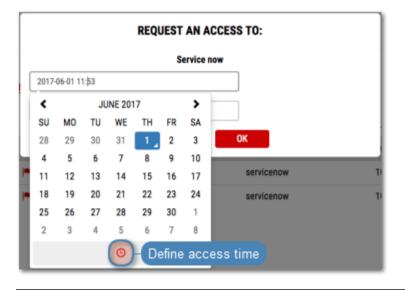

- 1. Log in to User Portal.
- 2. Find desired safe and click \square .

Fudo								admin 🗸
